SKILLS

- Python | Proficient
- Machine Learning | Good knowledge
- Ubuntu | Good knowledge
- C/C++ | Good knowledge
- ROS | Good Knowledge
- Communication
- Responsibility
- Organisation

LANGUAGES

- German | Native
- English | Advanced. Cambridge Advanced Certificate
- French | Intermediate
- Spanish | Elementary
- Arabic | Elementary

SUMMARY

I am a Master's student in Robotics, Systems, and Control at ETH Zurich. My sense of responsibility and structured approach have proven invaluable in many projects, most recently in my semesterthesis at RSL. My current goal is to improve the world of tomorrow through innovative solutions in the field of robotics.

EXPERIENCE

R&D ENGINEERING INTERN

Borobotics. Winterthur | Feb 2024 - Aug 2024

Development of concepts and solutions for mechanical problems, serving as a core team member in the creation of the second prototype within 2 months.

Design of complex assemblies for the drilling robot using CAD (SolidWorks)

TUTOR

Mint&Pepper. Zürich | Sep 2024 - Present

Guided workshops in robotics for children and teenagers aged 8-18. Prepared and executed various workshops. Fixed technical problems.

TEACHING ASSISTANT

ETH Zürich. Zürich | Feb 2022 - Jun 2023

Worked as a teaching assistant for mechanics II and control systems I

Preparation and presentation of weekly exercise sessions for groups of up to 30 people and assisting students with questions

MILITARY SERVICE

Swiss Army. Dübendorf ZH | Jan 2020 - Oct 2020

Air Force Sergeant in the Swiss Army

Led a group of up to 10 people in challenging situations

EDUCATION

ROBOTICS, SYSTEMS AND CONTROL MSC

ETH Zürich. | Sep 2024 - Present

Semester Thesis, RSL: RL-based Force and Pose Control for the ALMA Robot: trained and deployed reinforcement learning policies for contact-rich manipulation, with sim-to-real transfer.

Hands-on Project, SRL: Designed and built a dexterous robotic hand from scratch; trained control policies using imitation learning.

Algorithmic & Control Projects: Implemented a complete SLAM pipeline, solved full optimal control problems, and developed multiple MPC simulations, including advanced predictive control setups.

MECHANICAL ENGINEERING BSC

ETH Zürich. Zürich | Sep 2020 - Sep 2023

Bachelor Thesis - Temperature Modeling for Insect Breeding Systems: conducted intensive data analysis of a nonlinear dynamical system, followed by system identification and controller synthesis.

Weighted grade point average: 5.71

FEDERAL MATURA

KZO Wetzikon. Wetzikon | Aug 2013 - Jul 2019

Weighted grade point average: 5.5

HOBBYS

Travelling, Skiing, Driving Motorcycles, 3D-Printing, Bouldering
